Guidelines –Home Learning Plan (Primary - Classes 2 to 5)

Circular No.10/2020-21

Dear Parents,
Greetings!!

You may be worried about your child's learning and academic progress. But this time right now is their biggest opportunity to learn from real life as we all are undergoing this crisis globally. Go easy on keeping them occupied for long hours with school work, especially written work.

Here are somethings you need to know to setup this routine at home:

- Tell your children that they will be refreshing some concepts they already know and will also explore something new from the next grade
- Allocate a time and set it aside for learning everyday
- Sit with your child and provide assistance only when needed
- Follow the planner and guide your child. You can ask them to check and follow the planner by themselves too.
- Suggested plan is only a recommendation, your child can work on this using their own schedule.
- More than anything else, let this time be as enjoyable as possible.

The school will share a link with all relevant documents in a folder. The planner will give you details on what to do each day. The tasks for each week will be updated in the same folder. The folder will contain the following:

- a. Calm the corona - A series of easy to understand and fun activities aimed at helping the child understand all about the pandemic situation, exploring it with the facets of thinking and making a note of feelings and emotions that a child may be feeling during this crisis – This is to help the child understand the current scenario and overcome possible anxieties related to it
- b. Maths and English activities and worksheets for familiarizing the child with the previous academic year's key concepts and introducing the newer topics of the coming academic year

You can choose to print the material if you have access to a printer or keep it open on your system, tablet or phone and encourage children to work in their notebooks.

Do not worry about right or wrong. Use this time to experience the magic of bonding as a family. Enjoy exploring the Home Plan. We hope you have fun learning with your children and getting to know them better. And do not forget, we're all together in these tough times ahead.

Regards

Principal
